

MAJESTIC®

MARINE AND RV TV ANTENNA

UFO XL

Product features

Specially compatible with HDTV of various digital terrestrial signal (DVB-T, ISDB-T, DMB-T/H, ATSC) and DAB/FM radios.

The antenna is surface-treated to withstand impacts from saltwater and weather conditions

Build-in high gain and low noise amplifier, shielded for minimum interference.

Waterproof housing design made of UV resistant, injection molded ASA material with super durability.

Omnidirectional antennas receive VHF, UHF, and FM signal from every point regardless of the direction you are travelling.

The best digital terrestrial TV reception solution for your boating and caravans

SMD Technology and micro-electronics makes the high quality amplifier, ensure the excellent antenna performance.

UFO X

extreme digital performance

Technical Specification

Frequency range: VHF: 47-230MHz UHF: 470-862MHz

Receiving range: FM/VHF/UHF

Gain: 34dB

Noise figure: 3dB

Max. output level: 110dBμV

Impedance: 75Ω

Connector: F-connectors

Power supply: DC 12V/24V

Included in Packaging:

1. Antenna x 1
2. Lock Nut x 1
3. Rubber Boot x 1
4. F Connector x 4
5. F Socket PAL Plug x 1
6. 10M Coax TV Cable x 1
7. Power Supply Kit x 1
8. Instruction Manual x 1
9. Deck Mount x 1

Mounting the antenna:

Option 1. Use the deck mount for table stand. The screws included can be used to fix the antenna so it will not move. (Fig.1)

Fig.1

COAX TV CABLE CONNECTION

Connect the "F" male connector of the coaxial cable to the "F" female connector of the antenna, and wear the rubber boot to the end of the connected "F" connector. (Fig.2)

Fig. 2

POWER SUPPLY CONNECTION

Option 1: Power from AC/DC power adapter.(Fig.3)

- 1.Connect the cable from Antenna to power insert input.
- 2.Connect the output connector of the power insert to DTV receivers or TVs.
- 3.Connect the AC/DC adapter to the 12V/24V DC jack on the power supply unit, and plug the adapter into the power socket.

Option 2: Power from DC battery.(Fig.4)

- 1.Connect the cable from Antenna to power insert input.
- 2.Connect the output connector of the power insert to DTV receivers or TVs.
- 3.Connect the DC 12V input wires to the 12V/24V DC jack on the power insert.
- 4.Connect the other end of the wires "+" & "-" to the 12V DC system of vehicle/yacht.

Fig. 4

Operation Instruction:

Note: For the best reception, please check the following conditions

1. Keep the antenna away from the sources of interference: keep the antenna away from those big power consumption devices, such as air conditioner, elevator, hair dryer and microwave oven...etc.
2. Install the antenna as high as possible: in digital terrestrial reception, if there are some interceptions between antenna and transmission tower, it will cause the signal loss temporarily. So if the antenna is installed as high as possible, those interceptions will be reduced.

360° OMNI DIRECTION TV SIGNAL reception

Once the antenna and power supply have been installed and all cables have been properly connected, you must run a channel scan before watching TV in order to receive maximum programs. Run a channel scan as once the antenna is moved or the TV loses a channel. Now you can enjoy the TV program after you finish running a channel scan.
